Correction: One Additional Case of COVID-19 Confirmed in O'Brien County

Correction to the Press Release issued this morning from O'Brien County Public Health.

O'Brien County Public Health was informed this afternoon that the adult female in the age range of 41 to 60 lives in a different county within Iowa.

Updated Information: One additional case of coronavirus (COVID-19) has been confirmed in O'Brien County, bringing O'Brien County's total number of cases to four. According to the Iowa Department of Public Health (IDPH), the individual is an adult male in the age range of 41 to 60, and the individual is self-isolating at home.

Three of the four confirmed COVID-19 cases have recovered.

"We encourage all residents to continue to make prevention a priority," said O'Brien County Public Health Director, Judy Nieuwenhuis. These actions include:

- Washing hands frequently with soap and water for at least 20 seconds each time.
- Covering coughs and sneezes with a tissue or elbow/upper arm.
- Staying home when ill.
- Social Distancing – please avoid close contact with others (at least six feet).
- Clean and disinfect frequently touched surfaces.

Approximately 80% of Iowans infected with COVID-19, will experience only a mild to moderate illness. Most mildly ill Iowans do not need to go to their healthcare provider or be tested to confirm they have COVID-19. Sick Iowans must stay home and isolate themselves from others in their house. Stay home and isolate from others in the house until:

- You have had no fever for at least 72 hours (that is three full days of no fever without the use of medicine that reduces fevers)
AND
- other symptoms have improved (for example, when your cough or shortness of breath have improved)
AND
- at least 7 days have passed since your symptoms first appeared.

If you think you may need healthcare, call first. Your provider can assess whether you need to be seen in the office or if you can recover at home. There may also be options for you to talk to a medical provider from home using technology.
